

## UK Cum Boys

Saturday, 22 November 2008

It's always very cool to find a new UK gay porn site and while some of our porn companies might not be as slick and well-funded as the Yank ones, what they have that the American's don't is proper British beef! The lads in the videos at UK Cum Boys have a lot of meat on show and big, fat dicks seems to be the theme of this gay porn site. While it's not specifically a gay scally site, it does have some chavs and most of the lads look right proper hard to me and straight off a building site, and who cares anyway when they're this fit!

It's not the biggest porn site, but for a relatively new site it already has plenty of hot videos, nearly thirty, which is good value for what they're charging. As most of the lads are straight - although a few I've seen in other gay scally porn - it's a lot of wanking, although that's not a bad thing when the lads are so fit and have big cocks, and some of the lads aren't let off that easy in their solo sex videos and things do turn very anal with various things inserted up their arses - a 10 inch dildo being a common one, but also hands and one guy even tries with his own dick! Visit [UKcumboys.com](http://UKcumboys.com)

There are a few gay fuck videos and this site is worth the few quid they charge just for the couple of shoots starring very fit scally lad Tyson (who has been featured on Gay Scally Porn before) including his very first time getting fucked, and when you're first porn ass fuck is with gorgeous Rick Bauer I'm not surprised he came back for more - straight lad Rick fucks Tyson's butt until Tyson can't take it any more and then gives him a facial. I love watching a straight scally lad getting fucked by another straight geezer and this video alone is worth the recession-busting five quid membership - check out these pics or got to UK Cum Boys for the long, free preview clip.
